

Build capability. Qualify for the network.

Become sponsor-ready.

A structured pathway into the Celéri Pain Research Network — delivered with Hart Clinical Consultants — for practices that want to run investigator-initiated, sponsor-supported, and real-world evidence programs.

Research opportunity is growing. Most strong practices aren't study-ready yet.

Sponsors need community sites that start on time and deliver clean data. Celéri Health and Hart Clinical Consultants build the **people, processes, technology, and operating confidence** a practice needs to qualify for the network — and to move from its first study to a sustainable research portfolio.

THE READINESS PATHWAY

01 Assess Current capabilities, patient population, staff capacity, and study interests.	02 Prepare Close priority gaps with fit-for-purpose workflows, tools, and training.	03 Qualify Document readiness and establish a network profile for study matching.	04 Participate Evaluate matched opportunities and build a sustainable research portfolio.
--	---	---	---

WHAT THE PROGRAM INCLUDES

- **Readiness assessment.** Research goals, therapeutic focus, patient access, staffing, workflow, technology, and prior experience.
- **Practice action plan.** A prioritized roadmap with roles, near-term gaps, and a realistic launch sequence.
- **Research essentials.** Practical training on protocols, GCP, IRB interaction, consent, documentation, data entry, monitoring, and closeout.
- **Opportunity preparation.** Study feasibility, investigator expectations, site budgets, contracting, and sponsor-facing capabilities.
- **Celéri Health infrastructure.** Configurable PRO assessments, 21 CFR Part 11-ready EDC and data workflows, Command Center views, and evidence operations matched to the study.
- **Network enablement.** A documented practice profile, opportunity matching, and support as the practice progresses from first study to portfolio.

VALUE FOR PRACTICES

- A clearer path to research revenue
- Less disruption to clinical operations
- Stronger credibility with sponsors and CROs
- New evidence and publication opportunities

VALUE FOR SPONSORS

- Better-prepared community sites
- Access to diverse real-world populations
- More consistent startup and data quality
- A scalable practice-development pathway

FROM READINESS TO RESEARCH OPPORTUNITY

Prepared practices may be considered for Celéri Health-coordinated sponsor studies and multicenter investigator-initiated research based on study fit, feasibility, and sponsor selection. Practices retain ownership of their own registry data throughout.

Building a research-ready practice — or a stronger network of sites?

Let's design the right first step. learnmore@celerihealth.com · celerihealth.com

ILLUSTRATIVE SITE ECONOMICS

\$45,000 gross site revenue*

15 participants × \$3,000 fair-market-value compensation per participant

*Illustrative only. Actual compensation depends on protocol requirements, enrollment, fair-market-value budgets, site performance, and study-related costs. Network admission, study selection, enrollment, revenue, and profit are not guaranteed.
